Support@DataDove.io

I want to personally thank you for subscribing to our list. We are preparing to launch and some of you may still be confused as to what we are launching, some of you have received hints throughout the course, and some of you are just oblivious. So let me explain; we are launching a developmental premium discord group. Everything built from scratch and only going upwards.

Now what exactly does that entail? Our subscription price for BETA users will be locked into our one time lowest pricing of \$30/m. We are rapidly working to bring our partnerships and applications to you and by joining us you are the first to be part of our community and utilize our functionality. Due to the recent creation of our group we have full vacancy, but will definitely fill quickly.

Coming To DataDove© BETA

Monitors - Guides/Info - 24/7 Support - GLC - Groupbuys - Giveaways - Flips - Customs - Discounts

We would like to put it out there that our group is heavily focused on entry-level resellers, manual users, and those with interest in learning how to bot. If you're the type of collector/reseller that only gets '*none to one*' items per release, this group will provide the tools and information to boost that number up. You don't need to be a techie nor a botting pro to cop sneakers behind the scenes. We saw the lack of guidance for beginners and we hold the mindset that most bot users have their own community and can effortlessly function solo, but as manual users there is a gap. We're here to fill that gap and be the bridge that will make you a successful reseller.

Right off the bat, upon your subscription, we have many announcements and giveaways that we believe will definitely pique your interest. Think of it as a thank you for your early commitment. We are still very undecided on the limitations of BETA invites, so make sure you are locked in.
